**Candidacy Statement:**

Dear eligible voters,

I am honored to present my candidacy for the Council as a Registered Kinesiologist, committed to upholding the College's mandate of public protection. With a profound passion for the rehabilitation and fitness field, I bring a diverse range of experiences and a collaborative mindset that will contribute to the advancement of our profession.

Throughout my career, I have had the privilege of working closely within interdisciplinary teams, recognizing the immense value of collaboration in delivering comprehensive care. This experience has instilled in me a deep appreciation for the expertise and perspectives of fellow healthcare professionals.

Furthermore, I have actively engaged in volunteer work with the College, contributing to projects that prioritize quality assurance. This involvement has deepened my understanding of the College's vital

role in safeguarding public trust and ensuring high professional standards. If elected, I will continue to advocate for initiatives that enhance the quality of care, emphasizing ongoing professional development and evidence-based practices.

My candidacy is also strengthened by my specialized knowledge, skills, and experiences within the field. I possess expertise in areas such as exercise prescription, injury prevention, and rehabilitation techniques, which can prove invaluable in shaping effective policies and guidance. Additionally, my experience in managing and adapting to regulatory changes equips me with the foresight necessary to navigate evolving landscapes.

If elected, I am committed to representing the interests of Registered Kinesiologists, fostering collaboration among healthcare professionals, and promoting the highest standards of care for the public. Together, let us build a future where kinesiology continues to be a cornerstone of rehabilitation and fitness, benefiting individuals across our district.

Thank you for your consideration.

Sincerely,

Casey Capaz

Tournament volunteer	Peterborough Minor Lacrosse Association	2023 season

**Candidacy Statement:**

Having served on several committees over the past 6 years and on council for a full 3-year term now, I have gained valuable knowledge about governance within regulatory colleges. I would be grateful for the opportunity to continue serving alongside current and new council members given the momentum we currently have with regard to responding to legislative changes and to revising strategic plan direction. In addition, I would like to continue my growth in the chairing of meetings and in joining new committees. For a college to thrive in the area of public protection, I believe this type of succession planning is critical. To date, my committee involvement has mostly been with the Quality Assurance and the Inquiries, Complaints, and Reports committees, both of which have very important mandates. If given the chance, I would also like to serve a term as a council member on the Finance committee, an area of governance that would be a steep learning curve but a worthwhile challenge for me. While it isn't uncommon to see rapid turnover of council members in regulatory colleges, retention of council members who have completed extensive governance training and who

are consistently and meaningfully engaged can have a major impact on the success of a college. That's who I am, and I hope to continue serving the membership in this way.
